CHECKLIST

Developing a hypertension program

Program framework

The program framework outlined below helps make developing a hypertension program a manageable process. It can take 6-12 months to complete the eight key stages. The amount of time you spend each month and your resources for project management will dictate how long it will take.

Pre-planning

Medtronic team delivers: Establishing a HTN program presentation

Actions:

Include primary people who may champion a HTN program – interventional proceduralist, noninvasive cardiologist, or nephrologist and a nurse who may coordinate the care or the program development

Agenda:

- The urgency to act
- A manageable approach to HTN to build a HTN program
- Program examples
- Assessment and tools to get started

Target Date:

Complete:

1	Select a Hypertension Care Te	am to build the program	Target Date:
	Actions: Consider attending department meetings for cardiology and nephrology to share goals for building a program to see who might volunteer to co-chair or coordinate the program	Tasks: Identify the team considering which groups may be willing to partner: Interventionalist Nephrology Non-invasive Cardiology Nurse or program coordinator Who is the program champion as a lead decision maker? Who is designated as the lead to coordinate the effort?	Complete:
De	veloping a progra	am	
2	Host kickoff meeting		Target Date:
	Actions: Ask team to read the article: Controlling High Blood Pressure: An Evidence-Based Blueprint for Change AHA/AMA Article assessment	 Agenda: Brainstorm vision and goals for the HTN program Take AHA/AMA Assessment as a team (via the QR code to the left) Discuss article (via the QR code to the left) to consider ideas Review program development framework overview as directional reminder Discuss leadership support plan – when should this take place if it has not already, what is the cadence to keep them updated on progress? Determine cadence of meeting series for the team developing the program 	Complete:
3	Leadership review meeting		Target Date:
	Actions: Share initial plan to gain support and include additional ideas	Agenda: • Share team, goals, initial ideas for change, EHR request, timeline • Determine frequency of updates for this group (i.e., monthly)	Complete:
4 _a	Request electronic health reco	ords report for uncontrolled hypertension	Target Date:
	Actions: Request the EHR Reporting Guide from your Medtronic representative. Connect with IT and reference the Medtronic EHR Hypertension Reporting Guide to support the IT request	Agenda: Understand HTN control rates for the hospital or practice and who is managing those patients	Complete:
4 _b	EHR data and patient care pat	hway review meeting	Target Date:
	Actions: Send EHR summary in advance of meeting and copy of HTN guidelines	Agenda: • EHR data review • Compare current patient pathway to guidelines; any changes desired? • Review what other programs are doing - AHA certified centers - HTN specialist certification - Target: BP	Complete:
